

Expand your existing Blended Pulse™ technology using the EVO Upgrade Kit, compatible with AIM Command systems. Increase your sprayer capabilities, with added features for an improved application.

EVO Upgrade Kit

Kit includes an upgrade plate to replace existing master and slave modules, with EVO modules, user display, and all associated hardware and harnessing to interface with existing system.

Starting at \$5995 USD/\$ 7995CAD

Turn Compensation, High Flow Capability*, and Real-Time Display, all with a simple DIY capable installation.

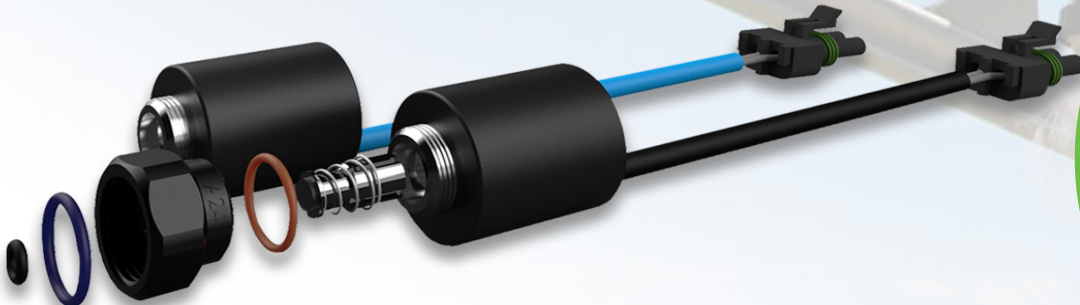

Retaining existing system operation and machine settings, the EVO Upgrade Kit is designed specifically to be plug-and-play.

*When Paired with CapstanAG 24-Series Flybody Valve Assemblies. Assembly: Flybody, Coil, Plunger, and O-Rings.

*12 watt coils for high flow may not be compatible with all configurations.

Valve Trade-In Program

Save up to 50% off new valve assemblies by trading in your current 7-watt assemblies through the CapstanAG Valve Trade-In Program. Eligible with the purchase of an EVO Upgrade Kit.
