

Orchard air blast sprayer calibration is critical to cost and efficiency. The SYNCHRO spray nozzle system is designed to maximize your nozzles. The easy to use setup tool allows for droplet selection and setting rate and pressure that will optimize sprayer performance and save product.

SYNCHRO

Infinitely-variable electronic nozzle system, specifically designed for optimizing your nozzle setup.

Easy to use wireless setup tool via your smart device, allows for nozzle profile setup, instant changes on each sprayer in your fleet, eliminating manual tip changes.

**THIS CONFIGURATIVE CALIBRATION TOOL PROVIDES
ACCURACY, CONSISTENCY, AND SAVINGS TO
YOUR BOTTOM LINE.**

SYNCHRO FEATURES

Variable electronic valves for infinite variability

Smart device WIFI nozzle configuration

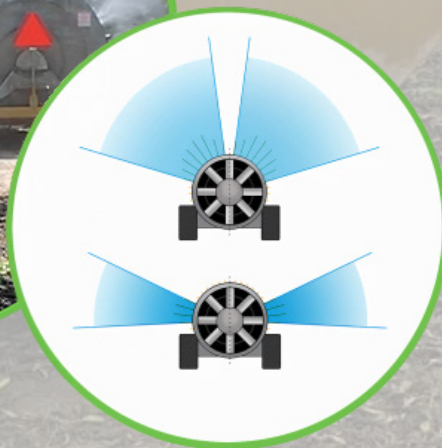

Momentary switch to change spray profiles for small or no tree applications.

Speed sensor compensates flow based off ground speed

Hi-Speed Valves for immediate ON/OFF
