

## Tech Bulletin: PinPoint III Apache Boom Recirculation Pin Designation

Units Affected: PPIII Systems Installed on Equipment Technologies Apache Sprayers.

### ISSUE

In previous revisions of PinPoint III software, the signal controlling the Boom Recirculation valve was available in Section Valve Ports 7 & 8, Pin 6. In current software, this has been changed to be only available in Section Valve port 7.

### RESOLUTION

Change harnessing to utilize Section Valve port 7, Pin 6 for the Boom Recirculation Signal. Recirculation Valve Power and Ground can also be moved to Section Valve Port 7.

Section Valve 7				
Pin	Description		Pin	Description
1	Section 7 Signal		4	Section Pressure
2	Ground		5	Section Ground
3	Section Power		6	Recirculation Signal
